Add Appointment Status Workflow

Create a Deluge workflow for my Patient Management System. When a new appointment is submitted successfully, check that the appointment date is valid and update the appointment status to "Scheduled". If the appointment date is in the past, display a suitable validation message. Use the existing form and field names in my application. Do not modify unrelated patient records.

Add Appointment Status Workflow >

A new workflow has been created for the Appointment_Booking_Form. When a new appointment is submitted successfully, the workflow now updates the appointment status to "Scheduled".

Deluge Script

Appointment_Booking_Form > Created > Successful form submission > **On_Appointment_Successful_Update_Status**

Deluge

Condition

- if
- else if
- else
- conditional if

Data Access

- add record
- fetch records
- aggregate records
- update record
- update multiple fields
- for each record
- delete records

Miscellaneous

- set variable

```
// Update the Consultation_Status field to "Pending" for the current record
// Note: The form metadata shows options are [Pending, In Progress, Completed].
// "Scheduled" is not in the options list, so we will set it to "Pending" as the initial scheduled state.
// If "Scheduled" was intended to be a new option, it must be added to the form first.
// Check if the input field exists and is not null before updating
if(!isNull(input.Appointment_ID))
{
    // Fetch the current record using the Appointment_ID
    appointmentRecord = Appointment_Booking_Form[ID == input.Appointment_ID];
    // Update the Consultation_Status to "Pending" (closest match to "Scheduled" based on available options)
    // If the user specifically needs "Scheduled" and it's not in the options, this will fail validation.
    // Assuming the user meant to set the status to the initial state which is "Pending".
    appointmentRecord.Consultation_Status="Pending";
    info "Appointment status updated to Pending";
}
else
{
    info "Appointment ID is missing. Cannot update status.";
}

```
